### **Prior Art cited**

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure

- Meyer (USPN 6,239,817) discloses at least two rib rows for guiding the recording medium conveyed by the conveying means at a position facing the recording head (Fig.3: element 35, 37), each rib row including a plurality of ribs in a direction intersecting the conveying direction of the recording medium (Fig.3: element 72-76, 84-88) and wherein arrangements of ribs of adjacent rib rows among the two rib rows are different from each other (Fig.3, Column4: line 61-64)

***Allowable Subject Matter***

3. Claims 15-19 are allowed.

The following is an examiner's statement of reasons for allowance:

- The primary reason for the allowance of claims 15-18 is the inclusion of the limitation of a recording apparatus comprising the recording data is divided into a plurality of data blocks so that recording is performed on a leading end or a rear end of the recording medium, with respect to the conveying direction, by a plurality of recording operations performed by positioning the leading end or the rear end of the recording medium on each of at least two ribs rows, and the recording data is divided into the data blocks so that a recoding operation based on each data block is not performed at a portion of the recording medium is superimposed with a rib and a portion corresponding to a vicinity thereof. These are limitations found in each claims, as it is claimed in the combination, that has not been found, taught, or suggested by the prior art of record which makes these claims allowable over the prior art.
- The primary reason for the allowance of claim 19 is the inclusion of the limitation of a recording apparatus comprising the recording data is divided into the data blocks so that a recoding operation based on each data block is not performed at a portion of the recording medium is superimposed with a rib and a portion corresponding to a vicinity thereof and wherein each data block has overlapped region recording data which is recording

data for a region overlapping another data block, and recording is performed except for recording data different from the overlapped recording data and the other recording data. These are limitations found in each claims, as it is claimed in the combination, that has not been found, taught, or suggested by the prior art of record which makes these claims allowable over the prior art.
